Community Consolidated School District 181

BOARD REPORT

CONTACT: Tracey Miller, Director of Assessment, Instruction, & Evaluation; Jamie Lavigueur, Director of Communications

TITLE: CSCI Survey Results

DATE: February 13, 2020

Objective:
To provide information on the results of the Comprehensive School Climate Inventory (CSCI) Survey that was administered to District 181 parents, students, and staff in December 2019.

Strategic Plan and/or Policy Connection:
3a: Culture of Community: Enhance respectful communication, dialogue, and transparency with all stakeholder groups.

Background and Information:
State statute requires that all Illinois school districts annually administer a climate and culture survey. The CSCI is one of the approved survey options identified by the Illinois State Board of Education. The survey is administered via email to all District parents; by email and at a staff meeting to all teachers; and in classrooms to students (grades 4-8).

The survey results provide the District with detailed data on school culture and climate by inquiring into 11 areas for students and parents and 13 areas for staff. Results are reported based on a 5.0 scale of median scores and are assigned to one of three categories: negative, neutral, and positive. The results of the CSCI aggregate reports suggest strong school climate throughout the District. None of the dimensions in the aggregate elementary and middle school reports received a negative rating. On a District level, the average of all 11 indicators for students and parents as well as all 13 indicators for staff fell in the positive range. Also, all nine D181 schools demonstrated improvement compared to the 2018-2019 results.

The data from the survey will be published in the District’s State Report Card and on the District website.
