This addendum shall be considered as part of the Contract Documents or Bidding Documents, as applicable, and shall govern insofar as it changes, deletes from or adds to the original Contract Documents or Bidding Documents, as applicable.

The Contract Documents or Bidding Documents as applicable shall be modified to incorporate the following changes:

I. PROJECT MANUAL

   A. Section 08 11 13 – Hollow Metal Frames

      1. ADD new paragraph 2.02.D.4 to read as follows:

      “4. Provide frames with welded mitered corners wherever possible. In location where frames with welded mitered corners are not possible, provide knockdown type frames, field weld corners and grind welds smooth to accept specified paint finish.”

      2. ADD new paragraph 3.02.B.2 and 3 to read as follows:

      “2. Frames to be installed in existing masonry openings shall be securely attached to existing construction with proper expansion type anchors (min. 3 per jamb). Anchor fasteners shall be countersunk at frame. After installation of frame, countersunk areas of the frame shall be filled and ground smooth to provide a consistent and uniform appearance with adjacent frame surfaces.

      3. After frames are installed in existing masonry openings, drill a hole near the top of each jamb, pump grout to fill each jamb solid with grout. Patch hole to provide a consistent and uniform appearance with adjacent frame surfaces.”
