GENERAL DEMOLITION NOTES

1. Remove all debris as necessary to accommodate the work in accordance with the site conditions.

2. Remove all items necessary for the work in accordance with the site conditions.

3. Remove all items necessary for the work in accordance with the site conditions.

4. Remove all items necessary for the work in accordance with the site conditions.

5. Remove all items necessary for the work in accordance with the site conditions.

6. Remove all items necessary for the work in accordance with the site conditions.

7. Remove all items necessary for the work in accordance with the site conditions.

8. Remove all items necessary for the work in accordance with the site conditions.

9. Remove all items necessary for the work in accordance with the site conditions.

10. Remove all items necessary for the work in accordance with the site conditions.

11. Remove all items necessary for the work in accordance with the site conditions.

12. Remove all items necessary for the work in accordance with the site conditions.

13. Remove all items necessary for the work in accordance with the site conditions.

14. Remove all items necessary for the work in accordance with the site conditions.

15. Remove all items necessary for the work in accordance with the site conditions.

16. Remove all items necessary for the work in accordance with the site conditions.

17. Remove all items necessary for the work in accordance with the site conditions.

18. Remove all items necessary for the work in accordance with the site conditions.

19. Remove all items necessary for the work in accordance with the site conditions.

20. Remove all items necessary for the work in accordance with the site conditions.

21. Remove all items necessary for the work in accordance with the site conditions.

22. Remove all items necessary for the work in accordance with the site conditions.

23. Remove all items necessary for the work in accordance with the site conditions.

24. Remove all items necessary for the work in accordance with the site conditions.

25. Remove all items necessary for the work in accordance with the site conditions.

26. Remove all items necessary for the work in accordance with the site conditions.

27. Remove all items necessary for the work in accordance with the site conditions.

28. Remove all items necessary for the work in accordance with the site conditions.

29. Remove all items necessary for the work in accordance with the site conditions.

30. Remove all items necessary for the work in accordance with the site conditions.

31. Remove all items necessary for the work in accordance with the site conditions.

32. Remove all items necessary for the work in accordance with the site conditions.

33. Remove all items necessary for the work in accordance with the site conditions.

34. Remove all items necessary for the work in accordance with the site conditions.

35. Remove all items necessary for the work in accordance with the site conditions.

36. Remove all items necessary for the work in accordance with the site conditions.

37. Remove all items necessary for the work in accordance with the site conditions.

38. Remove all items necessary for the work in accordance with the site conditions.

39. Remove all items necessary for the work in accordance with the site conditions.

40. Remove all items necessary for the work in accordance with the site conditions.

41. Remove all items necessary for the work in accordance with the site conditions.

42. Remove all items necessary for the work in accordance with the site conditions.

43. Remove all items necessary for the work in accordance with the site conditions.

44. Remove all items necessary for the work in accordance with the site conditions.

45. Remove all items necessary for the work in accordance with the site conditions.

46. Remove all items necessary for the work in accordance with the site conditions.

47. Remove all items necessary for the work in accordance with the site conditions.

48. Remove all items necessary for the work in accordance with the site conditions.

49. Remove all items necessary for the work in accordance with the site conditions.

50. Remove all items necessary for the work in accordance with the site conditions.

7. Property lines shown are approximate; exact to survey.
8. Property lines shown are approximate; exact to survey.
9. Property lines shown are approximate; exact to survey.
10. Property lines shown are approximate; exact to survey.

Work Scope Legend:
A. Full Depth Bituminous Paving Replacement:
- Provide painted striping and symbols per striping plan, meeting requirements and approval of the owner.
- Provide sealant, areas of severely damaged and/or deteriorated existing bituminous paving to be milled down 2". Inspect existing bituminous paving to be milled down 2". Inspect.
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

B. Mill Down Bituminous Paving Replacement:
- Provide painted striping and symbols per striping plan, meeting requirements and approval of the owner.
- Provide sealant, areas of severely damaged and/or deteriorated existing bituminous paving to be milled down 2". Inspect existing bituminous paving to be milled down 2". Inspect.
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

C. Full Depth Bituminous Paving:
- Provide painted striping and symbols per striping plan, meeting requirements and approval of the owner.
- Provide sealant, areas of severely damaged and/or deteriorated existing bituminous paving to be milled down 2". Inspect existing bituminous paving to be milled down 2". Inspect.
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

D. Tarmac Edge at Existing Grade
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

E. Bit. Paving Edge at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

F. Bit. Paving Edge at Full Depth Replacement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

G. Bit. Paving Sect. at Full Depth Replacement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

H. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

I. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

J. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

K. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

L. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

M. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

N. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

O. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

P. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

Q. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

R. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

S. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

T. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

U. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

V. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

W. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

X. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

Y. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.

Z. Bit. Paving Sect. at Existing Pavement
- Ensure smooth and flush condition with adjacent existing paving.
- Ensure proper drainage and away from building.
