

## French Club @ Madison School:

The Language Labs is happy to announce the return of:  
**“French Club”**

Did you know that French is spoken in 29 countries? It is spoken in all the five continents and more than 220 million people speak French - it also is the sixth most spoken language in the world!

Learning this creative language not only opens up your child’s world to an incredible culture it will provide them with a useful tool for travel and also a good base for learning other Romance languages (Spanish, Italian, Portuguese and Romanian).

The Language Labs is a multi-sensory program in which teach students through listening, speaking, reading and comprehension with role-play, music, visuals, songs, art and basic conversation.

Our vision is to “enrich young minds” by sharing our different culture and traditions which offer new and fascinating experiences for the children.

We look forward to teaching our native language to your student!

Merci Beaucoup!
