

## Spanish Club @ Madison School:

The Language Labs is back this year to host our...

### “Spanish Club”!

Spanish is the second most spoken language in the United States and the importance of learning this language can benefit your child and offer them endless advantages; such as a boost in confidence, more chances for social interactions, substantial work opportunities and also provides them an appreciation for the Spanish culture and many other cultures.

The Language Labs is a multi-sensory program in which we focus our teaching through listening, speaking, reading, and comprehension through music, songs, art, role-play & basic conversation.

One of our main visions are to “enrich young minds” by sharing our different traditions from the amazing Spanish culture which will offer new, compelling and fascinating experiences for your children.

We look forward to teaching your child our native language this year!

¡Muchas Gracias!
