

Digital Media.....

Who are You Online?

An Advisory Discussion

2016-2017

Your Digital Footprint

What is it?

All the information online either posted by you or by those with access to your social media sites. It's what people learn about you on the internet based on what you search, where you search, what you post and what others post about you or in response to you.

(you, your friends, your frenemies...)

What you put there...is ALWAYS out there..

DIGITAL FOOTPRINT

Facts you should know...

- Facebook, and other social media sites, may now archive 7 years of a person's online activity.
- These posts can be used by colleges and employers for background checks on prospective students and employees.
- A study by Microsoft showed that over 70% of employers have screened out potential employees based on information they have found online.

The Virus

Empathy reminder.....

- How do you think this girl felt?
- Some of you have a lot more courage online
 - Saying really hurtful message via text or anonymously that you would NEVER say in person.
 - Doing that is being a COWARD.

- It can happen online OR in person...
 -we know that this sometimes happens in sneaky ways in person.....
 - Example: You may INTENTIONALLY whisper to someone else while looking at someone you don't like. How do they feel? What does that make you look like?
-

Your Heart!

What can this lead to?

- Sadness.....Depression....Violence....Death by Suicide?
- You have the power to make the difference!
 - You can stop standing by (BYSTANDER) and stand up for that person or yourself (UPSTANDER)

Digital Management

When do you share it with an adult?

SAFETY!

SAFETY!

SAFETY!

- If a friend posts that they are going to harm themselves or someone else.
- If someone is trying to get personal information from you
- If someone seems like they will do something dangerous
